SIZE GUIDE

BOUYANCY

- **Front:** 3mm thick from neck to waist, and 5mm X-AIR neoprene from waist to calf. This is a capri-length wetsuit that is designed to end at about mid-calf.
- **Back:** 3mm thick neoprene
- **Arms/Shoulders:** 1.5-3mm thick neoprene

FLEXIBILITY

- **Anatomically-Correct Arms/Shoulder Panels:**
Allows for a natural range of motion in the swim stroke for faster, smoother swimming with less effort
- **Low-Profile Collar:**
Adds comfort and increased durability, ensuring that the suit stays intact and in place.
- **X-MAX Seam-Seal Technology:**
Uses a triple layer of glue and double-blind stitching to ensure long-lasting waterproof seams.
- **Design Based on the Vector Pro:**
Uses a triple layer of glue and double-blind stitching to ensure long-lasting waterproof seams.

LAVA SHORTS

SIZE

LAVA SHORTS are a must for swimmers and triathletes of all levels. LAVA Shorts lift your hips to simulate the same body position of a wetsuit. LAVA Shorts create proper technique and allow you to focus on speed. This is some of the best triathlon gear for swimming you'll ever find.

SPECS - 5 mm premium neoprene on the front and back. Drawstring. Ends just above knee.

BEGINNERS - Beginners will love the extra and immediate buoyancy that the lava shorts give you the second you put them on. If you are truly a hip-dragger then consider our LAVA PANTS (below the knee) which will provide slightly more buoyancy in your lower body.

INTERMEDIATE - LAVA SHORTS are designed for shorter speed and technique sets as well as cool-down. The shorts are above the knee thereby allowing for natural flip turns. For long swim sets, or for recovery swims, consider the LAVA PANTS which provide additional buoyancy.

ADVANCED - LAVA SHORTS can be used for both speed and recovery swims. For speed sets, LAVA Shorts will allow you to train at faster interval paces. For recovery sets, you will be able to focus on correct swimming form without exerting too much energy.

This training wetsuit offers race-level buoyancy and a natural range of motion at every training session, which over time improves technique and pacing while building muscle memory. Dynamic design makes LAVA Shorts comfortable to train in, do flip-turns, and easy to change into and out of. The waistband is low-cut in the front and rides higher in the back, allowing for natural breathing and comfortable flip turns without concern of losing your suit. LAVA Shorts are easy to put on in or out of the water, for a quick transition from warm up to workout to cool down. Made for the pool but warm enough for some open water swims, heavy-duty construction ensures that LAVA Shorts are a durable training tool for most water conditions.

LAVA SHORTS are completely legal under the new rules set by USAT and WTC when wetsuits are legal. LAVA SHORTS are a wetsuit and can only be worn in races that permit wetsuits. Always check with the race director prior to using the LAVA SHORTS in competition.

LAVA PANTS

SIZE

Rated the #1 swim training tool, LAVA PANTS are the secret weapon to making you train smarter and swim faster. Retire your pull buoy and focus more power on your swim stroke and proper body position.

SPECS - 5 mm premium neoprene on the front and back. Drawstring. Ends mid-calf (capri cut). Backside lower than lava shorts for easier flip-turns. This "training wetsuit" offers race-level buoyancy and a natural range of motion at every training session, which over time improves technique and pacing while building muscle memory. Proper body position increases stroke efficiency and adjusts for the proper catch-phase for racing. Dynamic design makes LAVA Pants comfortable to train in and easy to change into and out of.

The waistband is low-cut, allowing for natural breathing and comfortable flip turns. As a 3/4-length pant, LAVA Pants are easy to put on in or out of the water, for a quick transition from warm up to workout to cool down. Made for the pool but warm enough for some open water swims, heavy-duty construction ensures that LAVA Pants are a durable training tool for most water conditions.

LAVA PANTS are completely legal under the new rules set by USAT and WTC when wetsuits are legal. LAVA PANTS are a wetsuit and can only be worn in races that permit wetsuits. They are primarily intended for training, but are quickly showing up on the starting line of many triathlon swims.

This is some of the best triathlon gear for swimming you'll ever find. Swim faster in a pair of Lava Pants, neoprene swim pants made for swim training and racing.

XTERRA WETSUITS TRANSITION BACKPACK

The XTERRA Wetsuits Tripack Backpack is a necessity for race day and traveling to workouts. Our rugged transition bag is fully equipped to carry all of your triathlon gear. Designed to fit securely enough to wear on the pre-race bike ride to your transition station with just one must-have bag and peace of mind on race day.

FEATURES:

- Waterproof zipper compartment for neatly storing your wetsuit; expandable liner holds any size wetsuit
- Two external zipper pockets for phone, wallet, nutrition, tools or other smaller items. One pocket includes an internal key hook.
- Mesh water bottle pocket
- Large external mesh pocket with adjustable clasp for helmet, shoes or additional water bottles
- Padded adjustable straps fit close & comfortably

WETSUITS BACKPACK DRYBAG

This light and versatile dry bag is ideal for organizing and protecting your gear from the elements - sand, water, dirt, etc.. It is great for the pool deck where it will keep all your gear inside dry. Or, put all your wet clothes and towel inside and keep everything else dry.

Featuring a roll-top closure with sewn, taped construction and high frequency welded seams to ensure water-tightness. This dry bag is suitable for quick submersion and protects valuables from dirt, dust, sand, and water. Multi-purpose storage applications and reliable protection for your gear. The shoulder and back pads provide support and comfort on the walk to and from the beach. Double front clasps also provide additional ease of transportation.

This dry bag is ideal for strapping onto the front of your stand up paddle board, or leaving on shore while you SUP, kayak, swim or have fun in the water.

Approximate Volume: 1800 cu in. (30L) - ideally used when top is rolled tight, creating a 25 liter bag.

Approximate Dimensions:

- Top Circumference: 32"
- Bottom Circumference: 31"
- Height Fully Unrolled: 27" (remember, you'll want to roll it to close it)
- Back width: 10"

Main opening of dry bag provides optimal dryness for items. *Drybag front pocket is not waterproof. Maintain necessary items in main folded area of drybag.*

LAVA BOOTIES, THERMAL SWIM SOCKS

SIZE

"Cold feet" is nothing more than a figure of speech when you own a pair of LAVA Booties. Made of 2mm 4-way stretch neoprene, these booties are form fitting and insulating for cold water swimming.

Flex panels on the top of the foot and above the heel allow for comfortable movement while durable stitching holds the bootie in place. The ergonomic textured outsole provides stability and traction aboard wet surfaces and helps to protect your feet in rocky waters.

SIZING:

We suggest you wear your Lava Booties as tight as possible to prevent water pooling at the toes. They will be quite snug when putting them on, but will expand in the water.

LAVA SWIM GLOVES, THERMAL GLOVES

Cold hands or fingers? ... you need a pair of LAVA Swimming GLOVES.

Extend your time in the water and maximize your training with our new full finger

Neoprene Swim Gloves. Great for cold water swimming. These gloves deliver maximum warmth while being non-water absorbent. Extended cuff provides maximum protection from the cold.

Lava Gloves are ideal for swim training. If you intend to use these for racing please check with the race director.

Beginner tip – put your **wetsuit gloves UNDER the sleeves of your wetsuit**. This works for 90% of swimmers, so feel free to try it out in the pool prior to your race or training swim.

XTERRA WETSUITS' Neoprene LAVA GLOVES.

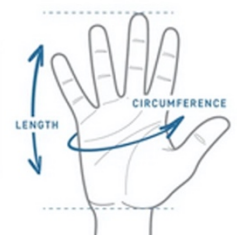

Material: Neoprene

Made of 2mm 4-way stretch neoprene

XTERRA SWIM BUOY - YELLOW/ORANGE

SWIM SAFE AND SMART THIS YEAR IN THE OPEN WATER. WHETHER YOU ARE SWIMMING ALONE OR WITH A GROUP, THE XTERRA HIGH-VIS SWIM BUOY WILL HELP KEEP YOU VISIBLE IN THE WATER.

VISIBILITY - This is the first swim buoy in the World that has dual colors (top is orange, bottom is yellow) to provide additional contrast in the water for higher visibility. The bright colors will make you more noticeable to boaters, paddleboarders, jet skiers and other swimmers.

LIGHT WEIGHT - If you've ever traveled to a foreign place, decided to take a swim off shore, and then been buzzed by a boater who simply wasn't on the look-out for swimmers? Well, you definitely need an XTERRA swim buoy. Your buoy is so light that you can keep it stashed in the bottom of your swim kit. When traveling to foreign places, if you need to go for a quick swim in foreign waters you'll be more visible.

MONITOR FROM ASHORE - Your friends and family can track you out in the water by sight, or even add a GPS device for tracking as well.

Not a PFD - It's not a personal floatation device (PFD). Please be smart when swimming, especially if you may be swimming outside your ability or comfort-zone.

Take it with you on all your open water adventures to alert boats and other watercraft of your location. Stuff any items you want to take with you inside the swim buoy and they will stay dry. Just strap the safety product around your waist and set off on your ocean excursion with peace of mind.

VISIBILITY. STORAGE. LIGHTWEIGHT.

Package Dimensions (24" x 10")

Belt Dimensions: 21" to 37" waist

Capacity: 15L

Color: Orange / Yellow

Your swim buoy comes with a dry pocket for storing your wallet or keys.

Please don't put electronic devices in it because we can't guarantee they won't get wet! We suggest that you use a waterproof case. Again, the extra pocket for storage is not intended for storing electronics like your phone or car keys that have a battery. Instead, double-bag or use a waterproof case.

This is not a floatation device. Always swim with a buddy. Know your surroundings. Don't swim outside your ability.

NEOPRENE SWIM CAP, THERMAL CAP

Increase your cold-water endurance with this comfortable neoprene swim cap that keeps your head and ears up to 3 degrees warmer. We recommend that swimmers begin training with a neoprene cap in the pool and open water 2 weeks before race day.

3 mm thickness

Size Small/ Medium < 22"

Size Medium/ Large 22"- 23"

KRAKEN SWIM PADDLE

As it is told, the Kraken Swim Paddle is imported from the depths of the Caribbean, and is named for the sea beast of myth and legend. The Kraken Paddle is strong, rich, multi-colored, and designed to make you swim smooth and fast.

Our Kraken Power Swim Paddles are great for swim training. They are contoured to the shape of your hand, and will help you develop proper stroke mechanics and strengthen your upperbody.

Small

- Paddle color = red; Paddle cords = black
- Paddle Size = 17 cm x 14.5 cm
- **Best for beginners, intermediates**
- **Ideal for speedwork for all levels of swimmers**
- **If you have small hands, stick with small & medium**

Medium

- Paddle color = black; Paddle cords = red
- Paddle Size = 20.5 cm x 17.5 cm
- **Best for everyone**

Large

- Paddle color = blue; Paddle cords = red & black
- Paddle Size = 24 cm x 20.5 cm
- **Best for intermediate and advanced swimmers**
- **If you have big hands, stick with large or medium**
